

DONATE MEDICINES, OXYGEN TANKS,
MASKS, HOST ONLINE CHARITY
EVENTS AND PROMOTE AWARENESS
AGAINST COVID-19 ON THE
BLOCKCHAIN.

WHAT ARE WE?

We are a Binance Smart Chain based charity token that aim to uniquely donate to people who got affected by covid through our App that is launching on July 25th

WHAT MAKES US UNIQUE

We aim to donate to areas and people who got affected by Covid-19 greatly based on community votes. The donations and votes will be conducted on a weekly basis.

We also aim to create an app that allows users host online charity events as well as purchase covid equipments and ship them off to areas where it's needed the most.

DEFLATIONARY MECHANISMS

To add some fun into the mix, \$SafeDistance will have a lot of fun features in its contract. SafeDistance will have 5% of its transaction fee reduced from the supply. Yes you heard it right, from the supply.

Say SafeDistance has 1 Trillion supply and magically an investor buys all of the supply, the total supply will be reduced by 50 Billion. Yes 50 Billion. That will give \$SafeDistance the potential to one day reach 1 dollar and with accelerate the deflation even more.

Additional features that the contract will have include 2% transaction tax that goes back to holders and 3% to a charity wallet that will be controlled by trusted members in the community.

Community members will be rewarded with more tokens and in-wallet staking/farming just by buying and holding due to superior tax mechanisms integrated into the SAFEDISTANCE token

DEFLATIONARY MECHANISMS

IN APP PRODUCTS AND SERVICES

The app will have a variety of covid related products and services for charity such as such as Oxygen Tanks, Face Masks, Sanitizers, and awareness spreaders. awareness spreaders will be volunteers who accept crypto and are given tasks such as going to hospitals and donating, cheering up patients and taking pictures to be used as unique NFT's

The app will also have a "run an event" option, where users can create events, host them and run them alone or with the help of other community members. examples of such events can be streaming a video and talking about the impact that Covid-19 had and accepting live donations just like on twitch. Events can be anything from video streaming to creating an anti-covid campaign to creating a fundraiser for an awesome idea that will benefit the world or spread awarness.

ROADMAP

Q2

- App Development
- Presale(Done through DXSALE with 100% Liq lock
- PancakeSwap Launch (Right after presale)

Early Q3

- Promotions & Marketing campaign(Pre & Post Launch)
- Token Buy-back & Burns
- AMA + DOX events

Mid Q3

- NGO Events + Covid Relief
- Safe distance campaigns IRL
- NFT marketplace with Liq lock lockups(UNIv3 on Pancake)

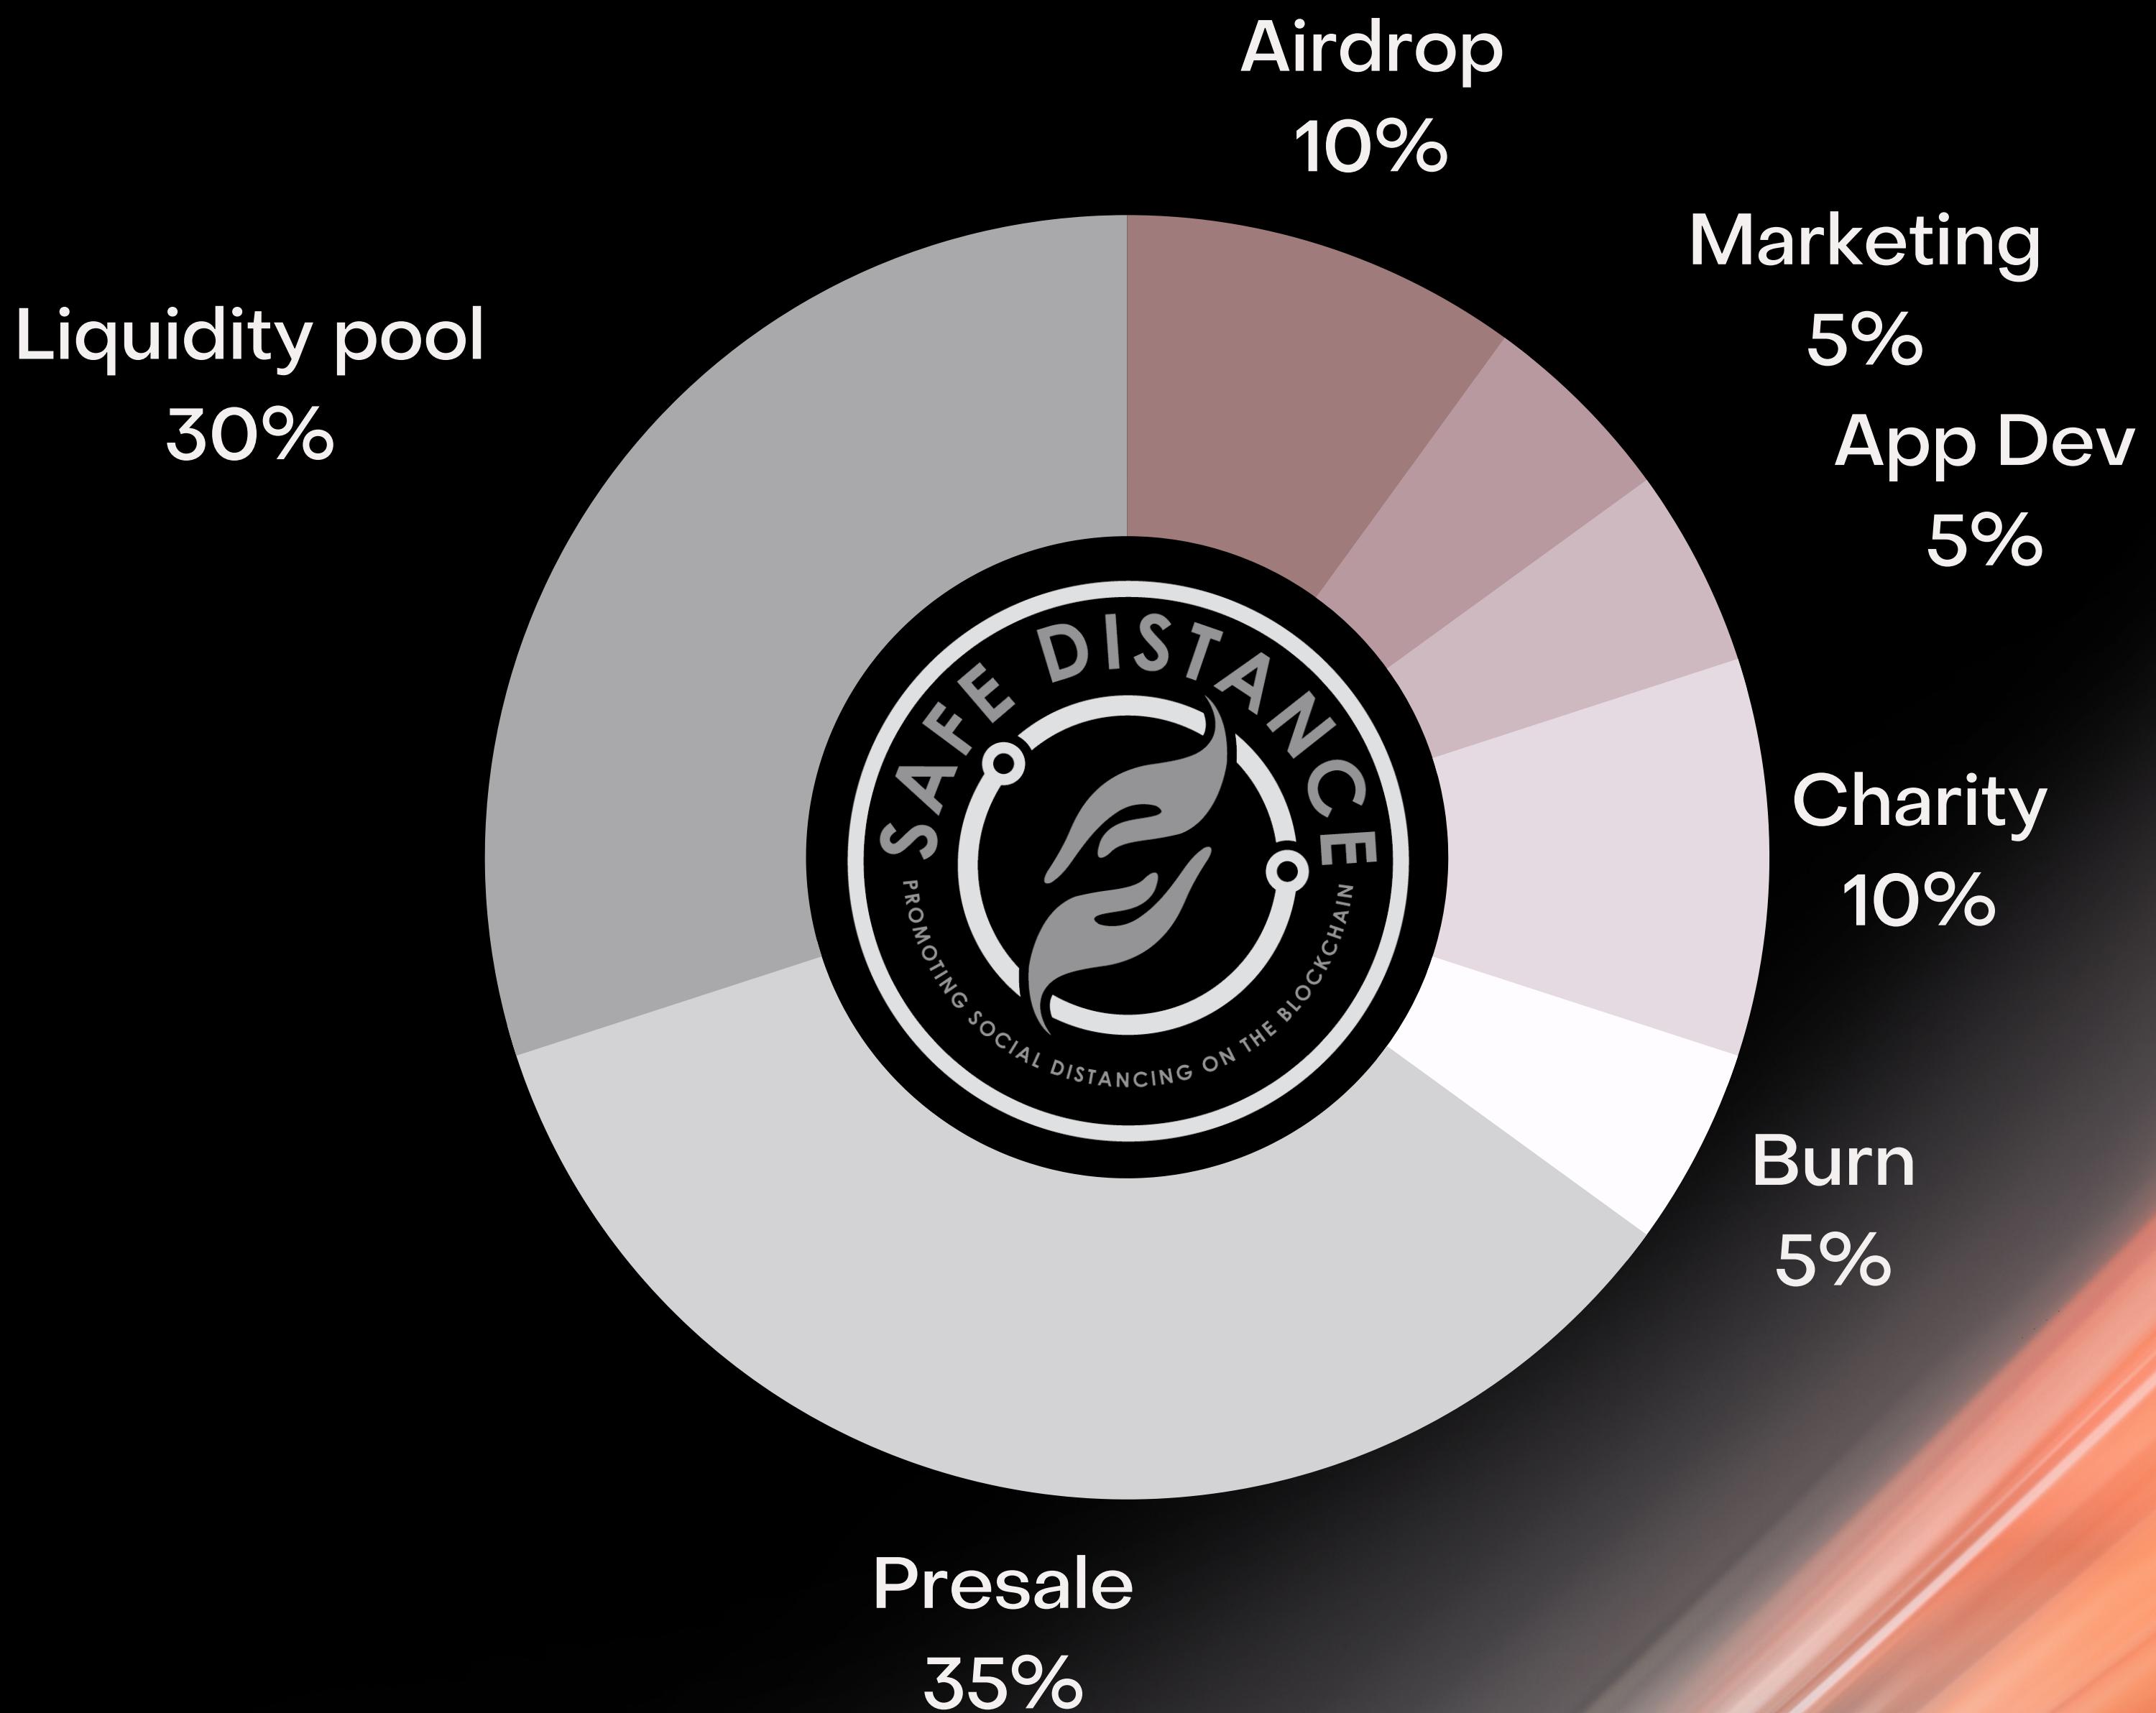

Late Q3

- NFT distribution capturing campaign events
- Quarterly Buy-back
- Quarterly Burns

Q4

- EOY Marketing events and vaccination drives
- COVID Stimulus charity marketplace with native governance token \$SAFEDISTANCE

COIN TOKENOMICS

**TOTAL SUPPLY IS 15,800,000,000
\$SAFEDISTANCE**

The total supply of the coin corresponds towards the total population of humans multiplied by 2 meters of SafeDistance

Presale Soft Cap: 300 BNB's
Presale Hard Cap: 350 BNB's
